

The City is in the process of scoring and evaluating all RFI responses and we intend to provide feedback by the end of May. We apologise for the delay and any inconveniences caused, which is due to the enormous volume of RFI responses received.

Subsequent to the RFI analysis, **only a short-list of respondents** will be identified who the City will engage in building a demonstration network to pilot the technology solutions as suggested in the respective RFI responses. A Terms of Reference document to guide the demonstration networks is currently being developed; this document will consider the respondents' feedback as stated in the RFIs with respect to the demonstration networks. It is expected that a briefing session, the date will be advised, will be held to discuss the Terms of Reference including the evaluation criteria applicable, prior to constructing the demonstration networks.

Following the demonstration network process, a short-list of respondents for the RFP will be determined.

We thank you for your patience.
