

**PUBLIC NOTICE:**

**Give us your views on the Cosmo City Climate Proofing Project here**

Dear Johannesburg resident,

We would like to encourage you to submit your comments on the Cosmo City Climate Proofing Project. The project involves the installation and distribution of Solar Water Heaters, insulated ceilings and energy efficient lights to 700 RDP homes in Extension 2 of Cosmo City near Kya Sands in Johannesburg. The aim of the project is to demonstrate the potential of creating more livable, resource efficient and resilient urban communities, through promoting renewable energy and energy efficiency in subsidised housing

The City aims to apply for Gold Standard certification of the project and generate carbon revenue.

You are invited to make comments on the local stakeholder consultation as well as all the project documents, including:

- Local Stakeholder Consultation Report: Includes a full report on local stakeholder consultation (a summarised version of comments received is also included for ease of reference)
- Gold Standard Passport: Presents all that is required to register under the Gold Standard
- PDD: Sets out the key elements to allow a project to be validated for meeting carbon standards.

Please make comments in writing **before the end of September 2010** to Lisa McNamara at [lisamc@joburg.org.za](mailto:lisamc@joburg.org.za).

Any person who cannot write may, during office hours, visit the office of the Environmental Management Department at the address mentioned below and request the below listed official to assist him or her to transcribe his or her comments.

Environmental Management Department

6<sup>th</sup> Floor

Traduna House

118 Jorrisen Street

Braamfontein

Att: Lisa McNamara

Tel. No. (011) 587 4245 or 011 587 4201
